

JCB SKID STEER DOZER BLADE

JCB SKID STEER | DOZER BLADE

JCB DOZER BLADE

The JCB Dozer Blade is an attachment that is suited for general grading, and land clearing applications.

FEATURES

- Universal skid steer quick attach mounting.
- Hydro-Electric controlled angle and tilt, using only one loader valve.
- Angle and tilt cylinders are interchangeable and equipped with self-aligning bearings.
- Reversible .75"x8" bolt on cutting edge and rolled moldboard .31" thick and 28" high.
- Blade angle is 30 degrees left and right and tilts 10 degrees each way from horizontal.
- Tilt indicator is visible from operators seat.
- Optional Electric control box for units not equipped with electrical attachment controls.
