

### JCB SLOT CUTTER

The 3 inch slot cutter is a great tool for routing out cracks in asphalt prior to repair. It is also used to cut across streets prior to digging for utility cuts to simplify the pavement restoration. Another application is to cut around potholes to be repaired to provide a clean solid edge for the repair.

### FEATURES

- Patented roll-in depth control allows the operator to easily change the depth of cut by utilizing the skid steers bucket function.
- High torque direct drive motors deliver power directly to the cutting disc.
- Standard hydraulic side shift for cutting close to curbs or obstructions.
- The front down design keeps the front of the slot cutter on the ground during operation to eliminate the throwing of debris.
